PROJECT INFORMATION:
DOUBLETRAP INFILTRATION

CURRENT ISSUE DATE:
ISSUED FOR:
SAMPLE PROJECT

ENGINEER INFORMATION:

PATENTS LISTED AT: [HTTP://STORMTRAP.COM/PATENTS]
1. STORMTRAP MODULES SHALL BE MANUFACTURED AND INSTALLED ACCORDING TO SHOP DRAWINGS APPROVED BY THE INSTALLING CONTRACTOR AND ENGINEER OF RECORD. THE SHOP DRAWINGS SHALL INDICATE SIZE AND LOCATION OF ROOF OPENINGS AND INLET/OUTLET PIPE TYPES, SIZES, INVERT ELEVATIONS AND SIZE OF OPENINGS.

2. COVER RANGE: MIN. 1.0'- MAX. 6.0' (CONSULT STORMTRAP FOR ADDITIONAL COVER OPTIONS).

3. ALL DIMENSIONS AND SOIL CONDITIONS, INCLUDING BUT NOT LIMITED TO GROUNDWATER AND SOIL BEARING CAPACITY ARE REQUIRED TO BE VERIFIED IN THE FIELD BY OTHERS PRIOR TO STORMTRAP INSTALLATION.

STORMTRAP SYSTEM INFORMATION

WATER STORAGE Req'D: 40000 CUBIC FEET
WATER STORAGE Prov'd: 42750.76 CUBIC FEET
UNIT HEADROOM: 10'-0" DOUBLETRAP
UNIT QUANTITY: 84 TOTAL PIECES
BILL OF MATERIALS

DESIGN CRITERIA

ALLOWABLE MAX GRADE = 16.50
ALLOWABLE MIN GRADE = 11.50
INSIDE HEIGHT ELEVATION = 0.00
SYSTEM INSERT = 0.00
STORMTRAP VOLUME = 42750.76 C.F.

NOTES:
1. DIMENSIONS OF STORMTRAP SYSTEM SHOWN BELOW ALLOW FOR A 3/4" GAP BETWEEN EACH MODULE.
2. ALL DIMENSIONS TO BE VERIFIED IN THE FIELD BY OTHERS.
3. SEE SHEET 3.0 FOR INSTALLATION SPECIFICATIONS.
4. SP - INDICATES A MODULE WITH MODIFICATIONS.
5. P - INDICATES A MODULE WITH A PANEL ATTACHMENT.
6. CONTRACTORS RESPONSIBILITY TO ENSURE CONSISTENCY/ACCURACY TO FINAL ENGINEER OF RECORD PLAN SET.

INfiltration opening (Typ)

1-877-867-6872

PATENTS LISTED AT: [https://STORMTRAP.COM/PATENT]
1. STORMTRAP SHALL BE INSTALLED IN ACCORDANCE WITH ASTM C681, STANDARD FOR INSTALLATION OF UNDERGROUND PRECAST CONCRETE UTILITY STRUCTURES. THE FOLLOWING ADDITIONS AND OR EXCEPTIONS SHALL APPLY:

2. IT IS THE RESPONSIBILITY OF THE INSTALLING CONTRACTOR TO ENSURE THAT PROPER/ ADEQUATE EQUIPMENT IS USED TO SET/INSTANT THE MODULES.

3. STORMTRAP MODULES CAN BE PLACED ON A LEVEL, 6" FOUNDATION OF AGGREGATE EXTENDING 2'-0" PAST THE OUTSIDE OF THE STRUCTURE. THE MODULES SHALL BE PLACED ON PROPERLY COMPACTED SOILS (SEE NOTE 3) FOR SOIL BEARING CAPACITY REQUIREMENTS, AND IN ACCORDANCE WITH ASTM C681 STANDARD PRACTICE FOR INSTALLATION OF UNDERGROUND UTILITY STRUCTURES.

4. THE STORMTRAP MODULES SHALL BE PLACED SUCH THAT THE MAXIMUM SPACE BETWEEN ADJACENT MODULES DOES NOT EXCEED 2" (SEE DETAIL 4). IF THE SPACE EXCEEDS 2", THE MODULES SHALL BE RESET WITH APPROPRIATE ADJUSTMENT MADE TO LINE AND GRADE TO BRING THE SPACE INTO SPECIFICATION.

5. STORMTRAP MODULES ARE NOT WATERPROOF. IF A WATERPROOF SOLUTION IS REQUIRED, CONTACT STORMTRAP FOR RECOMMENDATIONS. THE WATERPROOF APPLICATION IS TO BE PROVIDED AND IMPLEMENTED BY THE CONTRACTOR. THE CONTRACTOR IS RESPONSIBLE TO ENSURE THAT THE WATERPROOF SOLUTION PERFORMS AS SPECIFIED BY THE MANUFACTURER. CONTACT STORMTRAP IF A WATERPROOF APPLICATION IS REQUIRED.

7. ALL EXTERIOR JOINTS BETWEEN ADJACENT STORMTRAP MODULES SHALL BE SEALED WITH 8" WIDE PRE-FORMED, COLD-APPLIED, SELF-ADHERING ELASTOMERIC RESIN BONDED TO A WOVEN, HIGHLY PUNCTURE RESISTANT POLYMER WRAP, CONFORMING TO ASTM C681 AND SHALL BE INTEGRATED WITH PRIMER SEALANT AS APPROVED BY STORMTRAP (SEE DETAIL 3). THE MASTIC JOINT TAPE DOES NOT PROVIDE A WATERPROOF SEAL. THE SOLE PURPOSE OF THE JOINT TAPE IS TO PROVIDE A SILT AND SOIL TIGHT SYSTEM. THE ADHESIVE EXTERIOR JOINT WRAP SHALL BE INSTALLED ACCORDING TO THE FOLLOWING INSTALLATION INSTRUCTIONS:

8. USE A BRUSH OR WET CLOTH TO THOROUGHLY CLEAN THE OUTSIDE SURFACE AT THE POINT WHERE JOINT WRAP IS TO BE APPLIED.

10. IF THE CONTRACTOR NEEDS TO CANCEL ANY SHIPMENTS, THEY MUST DO SO 48 HOURS PRIOR TO THEIR SCHEDULED ARRIVAL AT THE JOB SITE. IF CANCELED AFTER THAT TIME, PLEASE CONTACT THE PROJECT MANAGER.

11. IF THE STORMTRAP MODULE(S) IS DAMAGED IN ANY WAY PRIOR, DURING, OR AFTER INSTALL, STORMTRAP MUST BE CONTACTED IMMEDIATELY TO ASSIST IN ASSESSING THE DAMAGE AND TO DETERMINE WHETHER OR NOT THE MODULE(S) WILL NEED TO BE REPLACED. IF ANY MODULE ARRIVES AT THE JOB SITE DAMAGED, DO NOT UNLOAD IT. CONTACT STORMTRAP IMMEDIATELY. ANY DAMAGE NOT REPORTED BEFORE THE TRUCK IS UNLOADED WILL BE THE CONTRACTOR'S RESPONSIBILITY.

12. STORMTRAP MODULES CANNOT BE ALTERED IN ANY WAY AFTER MANUFACTURING WITHOUT WRITTEN CONSENT FROM STORMTRAP.

PATENTS LISTED AT: [HTTP://STORMTRAP.COM/PATENT]
1. END PANELS WILL BE SUPPLIED TO CLOSE OFF OPEN ENDS OF ROWS.
2. PANELS SHALL BE INSTALLED IN A TILT UP FASHION DIRECTLY ADJACENT TO OPEN END OF MODULE (REFER TO SHEET 2.0 FOR END PANEL LOCATIONS).
3. CONNECTION HOOKS WILL BE SUPPLIED WITH END PANELS TO SECURELY CONNECT PANEL TO ADJACENT STORMTRAP MODULE (SEE PANEL CONNECTION ELEVATION VIEW).
4. ONCE CONNECTION HOOK IS ATTACHED, LIFTING CLUTCHES MAY BE REMOVED.
5. JOINT WRAP SHALL BE PLACED AROUND PERIMETER JOINT PANEL (SEE SHEET 3.0).
STORMTRAP ZONE INSTALLATION SPECIFICATIONS/PROCEDURES

1. The fill placed around the Stormtrap modules must be deposited on both sides at the same time and to approximately the same elevation. At no time shall the fill behind one side wall be more than 2'-0" higher than the fill on the opposite side. Backfill shall either be compacted and/or vibrated to ensure that backfill aggregate stone material is well seated and properly interlocked. Care shall be taken to prevent any wedging action against the structure, and all slopes within the area to be backfilled must be stepped or serrated to prevent wedging action. Care shall also be taken as not to disrupt the joint wrap from the joint during the backfill process. Backfill material shall be clean, crushed, angular No. 5 (AASHTO M43) aggregate. If native earth is susceptible to migration, confirm with geotechnical engineer and provide protection as required.

2. During placement of material over the system, at no time shall machinery be used over the top that exceeds the design limitations of the system. When placement of material overtop, material shall be placed such that the direction of placement is parallel with the overall longitudinal alignment of the system whenever possible.

3. The fill placed overtop the system shall be placed at a minimum of 6" lifts. At no time shall machinery or vehicles greater than the design HS-20 loading criteria travel overtop the system throughout the minimum design coverage. If travel is necessary overtop the system prior to achieving the minimum design cover, it may be necessary to reduce the ultimate load burden of the operating machinery so as to not exceed the design capacity of the system. In some cases, in order to achieve required compaction, hand compaction may be necessary in order not to exceed the allotted design load.

NOTE 1: The fill placed around the Stormtrap modules must be deposited on both sides at the same time and to approximately the same elevation. At no time shall the fill behind one side wall be more than 2'-0" higher than the fill on the opposite side. Backfill shall either be compacted and/or vibrated to ensure that backfill aggregate stone material is well seated and properly interlocked. Care shall be taken to prevent any wedging action against the structure, and all slopes within the area to be backfilled must be stepped or serrated to prevent wedging action. Care shall also be taken as not to disrupt the joint wrap from the joint during the backfill process. Backfill material shall be clean, crushed, angular No. 5 (AASHTO M43) aggregate. If native earth is susceptible to migration, confirm with geotechnical engineer and provide protection as required.
RECOMMENDED ACCESS OPENING SPECIFICATION

1. A typical access opening for the StormTrap system are 2'-0" in diameter. Access openings larger than 3'-0" in diameter need to be approved by StormTrap. All openings must retain at least 1'-0" of clearance from the end of the StormTrap module unless noted otherwise. All access openings to be located on inside leg unless otherwise specified.

2. Plastic coated steel steps produced by Mac Industries part #853-000 or approved equal. See step details. Steps are provided inside any module where deemed necessary. The highest step in the module is to be placed a distance of 1'-0" from the inside edge of the StormTrap modules. All ensuing steps shall be placed with a maximum distance of 1'-0" between them. Steps may be moved or altered to avoid openings or other irregularities in the module.

3. StormTrap lifting inserts may be relocated to avoid interference with access openings or the center of gravity of the module as needed.

4. StormTrap access openings may be relocated to avoid interference with inlet and/or outlet pipe openings so placement of steps is attainable.

5. Access openings should be located in order to meet the appropriate municipal requirements. StormTrap recommends at least two access openings per system for access and inspection.

6. Use precast adjusting rings as needed to meet grade. StormTrap recommends for cover over 2' to use precast barrel or cone inspections. (Provided by others)

RECOMMENDED PIPE OPENING SPECIFICATION

1. Minimum edge distance for an opening on the outside wall shall be no less than 1'-0".

2. Maximum opening size to be determined by the module height, preferred opening size is 36" or less. Any opening needed that does not fit this criteria shall be brought to the attention of StormTrap for review.

3. Connecting pipes shall be installed with a 1'-0" concrete collar, and an aggregate cradle at least one pipe length (see pipe connection detail), a structural grade concrete or high strength, non-shrink grout with a minimum 28 day compressive strength of 3000 psi shall be used.

4. The annular space between the pipe and the hole shall be filled with high strength non-shrink grout.

RECOMMENDED PIPE INSTALLATION INSTRUCTIONS

1. Clean and lightly lubricate all of the pipe to be inserted into StormTrap.

2. If pipe is cut, care should be taken to allow no sharp edges, bevel, and lubricate lead end of pipe.

3. Align center of pipe to correct elevation and insert into opening.

Note: All ancillary products recommended and shown on this sheet are recommendations only and subject to change per the Installing Contractor.
NOTES:
1. OPENING LOCATIONS AND SHAPES MAY VARY.
2. SP - INDICATES A MODULE WITH MODIFICATIONS.
3. P - INDICATES A MODULE WITH A PANEL ATTACHMENT.
4. POCKET WINDOW OPENINGS ARE OPTIONAL.
